

When the paper comes back

THE ONE IDEA

The forty minutes when a paper comes back are the most valuable forty minutes of the term, if you do three things.

1. WRITE THE MARK BESIDE EVERY QUESTION AS HE GOES

Got, out of possible. Fill the table while he talks; the bin column can wait until the end.

2. SORT EVERY LOST MARK INTO ONE OF THREE BINS

Bin	What it means	The cure
K Did not know	A word, a definition or a method was missing. A memory problem, not a mystery.	The sheet for that section, read once; the word goes on the handout's trap list.
S Slip	Knew it, wrote it wrong: a dropped minus sign, a wrong bracket, a copied number.	A checking habit: one re-read of each answer against the question before moving on.
T Out of time	Never reached it, or rushed it.	Order of attack: shortest sure marks first, decided in the five reading minutes.

Q	Got / out of	Bin	One line: what actually happened
1	/		
2	/		
3	/		
4	/		
5	/		
6	/		
7	/		
8	/		
9	/		
10	/		
11	/		
12	/		
13	/		
Total	/ 80	K: S: T:	

3. ASK THREE QUESTIONS

1. Which question did the class lose the most marks on, and what was the usual mistake?

2. Does the “find k such that” type of question come back in Exam II on 29 October (sections 2.1 to 2.5)?

3. With the five reading minutes, what order of questions would you have chosen, and why?

THEN

Photograph every page of the paper, including the cover with the total, and put the photos in the folder. The producer wants to see where the marks went, not the number.
